File No. I-88-1D

IN THE MATTER OF the *Ontario Automobile Insurance Board Act*, 1988, S.O. 1988, c. 18;

AND IN THE MATTER OF an industry-wide hearing by the Ontario Automobile Insurance Board pursuant to section 20 of the said Act.

NOTICE OF HEARING INDUSTRY-WIDE HEARING

The Ontario Automobile Insurance Board (the "Board") will commence the fourth part of its Industry-Wide Hearing, under File No. I-88-1D, on Monday December 12, 1988 at 9 o'clock a.m. in the Board's Hearing Room, 2nd Floor; 5 Park Home Avenue, North York.

The purpose of this hearing is to set rates or ranges of rates for the classes of risk exposure set out in the Board's Decisions under File No. I-88-1A (the "Board Class Plan").

William M. Mercer Limited was engaged by the Board to produce proposed rates or ranges of rates (the "Proposal"). William M. Mercer Limited is independent of the Board and of the insurance industry. The purpose of publishing proposed rates in the form of a proposal is to assist both the Board and the public by providing one context for the hearing. The Proposal is not binding on the Board. The proposal will be released in two parts. The first part, available to any person upon request after December 5, 1988, will be restricted to proposed rates for Personal Vehicles – Private Passenger Automobile. The second part, available to any person upon request on January 23, 1989, will deal with proposed rates for all other categories of insurance identified in the Board Class Plan.

A pre-hearing conference will be held on Wednesday, December 7, 1988 at 9 o'clock a.m. in the Board's Hearing Room to deal with preliminary matters, including, but not limited to the following:

- written evidence to be pre-filled
- the interrogatory process
- the hearing process
- issues

If you wish to participate as a party in the hearing, you (or your lawyer or agent) must file with

the Board a written notice of your intention to participate as a party with the Board on or before Tuesday, December 6, 1988. A person who files such a notice intends to fully participate in the hearing. If you have already filed your notice of intention to participate in response to the Notice dated July 6, 1988, it is not necessary to file a further notice.

Instead of Participating as a party in the hearing, you may comment on any of the issues as a Limited Intervenor by filing a letter of comment with the Board. A letter of comment should clearly state your views, set the grounds and the factual basis for your position, and indicate whether you intend to make an oral presentation to the Board. Letters of comment on Part 1 of the Proposal – Private Passenger Automobile must be filed at the Board's office on or before Monday, December 19, 1988. Letters of comment on Part 2 of the Proposal must be filed on or before Monday, February 6, 1989.

All documents filed in this proceeding are available for viewing at the Board's office during office hours Monday to Friday, 8:30 a.m. to 4:45 p.m.

Procedural orders as to how the matter will proceed may be issued from time to time. Copies of any procedural orders will be sent to all persons filing a notice of intention to participate.

If you do not become a party to the hearing or indicate that you wish to make an oral presentation to the Board, the Board may proceed in your absence and you will not be entitled to any further notice of these proceedings.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

- A. The objectives of the Provincial Parks Program are consistent with the conservation, protection and wise management of the environment.

Notice of all such dispositions will be given to the Ministry of the Environment as per Condition 3 below.
- 3. Copies of project plans will be made available for public inspection at the appropriate District Office of the MNR.

4. The local public will be informed of the completion of interim management statements for the Parks. Copies of the interim management statements will be maintained at the appropriate MNR District Office and will be made available for public inspection upon request. Lists of completed statements will be maintained in all MNR regional offices and its main office. Individual statements will be made available for inspection upon request.

5. Any activity exempt under this Order that would be approved under a MNR Class Environmental Assessment, except that the approval does not apply to provincial parks, shall be carried out in accordance with the appropriate Class EA procedures, including notification, as though the activity were not in a provincial park.

6. The MNR will notify, individually, each landowner whose property would abut or would be surrounded by a Park. Such notification will occur prior to either designation by regulation of the area under the *Provincial Parks Act* or the initial invitation for public consultation in the park management planning process, whichever occurs first.

7. The MNR may combine any of the proposed parks with an existing park or exclude lands currently scheduled for inclusion in a new park. However, before the MNR amends or rescinds boundary regulations for a park (which, for greater clarity, includes the elimination of the entire area of a park) and, following appropriate public consultation and notification, it shall give at least forty-five days notice to the Environmental Assessment Branch and the appropriate Regional Office of the Ministry of the Environment.

8. Within forty-five days of receiving notification from MNR under Condition 3 or Condition 7, and, after consultation with the Minister of Natural Resources, the Minister of the Environment may, by written notice to the Minister of Natural Resources which outlines his reasons, direct:

1. that an environmental assessment be prepared for the plan or project, in which event the project will not be exempt under this Order; or

2. that he is considering the application of subcondition 8 (1) to a plan or project.

9. Where the Minister of the Environment has given written notice to the Minister of Natural Resources that he is considering the application of Condition 8 to a plan or project, the MNR shall not implement the project until forty-five days have elapsed from the giving of notice or the Minister of the Environment gives written notice to the Minister of Natural Resources that it is not proposed to require an environmental assessment, whichever occurs first.

(3) Where a direct discharger is required to measure the flow of a combined effluent stream, the direct discharger shall continuously measure that flow using methods and devices installed at the stream capable of accuracy to within plus or minus 20 per cent of the actual flow.

(4) Where a direct discharger is required to measure or estimate the flow of an effluent stream at the time of each sampling and the sampling is done in accordance with clause 3 (4) (a), (b), (c), (d) or (e), the direct discharger shall measure or estimate that flow at least three times over the twenty-four hour sampling period, at intervals of at least six hours.

(5) Despite subsection (4), where a direct discharger is required to measure or estimate the flow of a batch discharge effluent stream at the time of each sampling and the sampling is done in accordance with clause 3 (4) (a), (c) or (e), the direct discharger shall measure or estimate that flow at least once during each batch discharge.

(6) Every direct discharger shall use methods, devices or calculations for the measurement or estimation of the flow of a once-through cooling water effluent stream, a storm water effluent stream, a batch discharge effluent stream or a waste disposal site effluent stream that are capable of accuracy to within plus or minus 20 per cent of the actual flow.

(7) Every direct discharger shall field calibrate all secondary flow measuring devices before the collection of the first set of samples required to be collected under a Sectoral Effluent Monitoring Regulation according to good operating practices or the manufacturer's recommendations, whichever is superior, and shall verify such calibration at regular intervals not exceeding one year.

(8) Every direct discharger shall use only flow measuring devices equipped so as to enable inspection by a provincial officer.

(9) Every direct discharger shall install and maintain all flow measuring devices according to good operating practices or the manufacturer's recommendations, whichever is superior. O. Reg. 695/88, s. 6.

“General Effluent Monitoring Regulation” means Ontario Regulation 695/88;

“once-through cooling water sampling point” means a location in a once-through cooling water effluent stream situated before the place of discharge to a surface watercourse and after the addition of boiler feedwater treatment effluent, cooling tower blow-down or clean surface runoff;

(3) The said subsection 1 (1) is further amended by adding thereto the following definitions:

"landfarm leachate effluent stream" means landfarm leachate which flows through an open or closed channel;

"landfarm leachate sampling point" means a location in a landfarm leachate effluent stream situated,

- (a) before the place of discharge to a surface watercourse,
- (b) after final treatment, and
- (c) upstream of any significant contaminant masking or significant dilution by any other effluent;

"storm event" means that period of precipitation in any twenty-four hour period,

- (a) during which rainfall exceeds five millimetres as indicated by a rain gauge or an Environment Canada meteorological station located within fifteen kilometres of the refinery, and
- (b) which is separated from any immediately preceding period of rainfall by a minimum of six hours;

(4) Subsection 1 (2) of the said Regulation is revoked and the following substituted therefor:

(2) The definitions in section 1 of the General Effluent Monitoring Regulation that are not redefined in this Regulation apply to this Regulation.

(2a) In construing the General Effluent Monitoring Regulation, "plant" includes the refineries named in subsection 3 (1). O. Reg. 696/88, s. 1 (4).

2. Subsections 3 (3) and (4) of the said Regulation are revoked and the following substituted therefor:

(3) Each direct discharger shall carry out the monitoring obligations, including the sampling, analysis, toxicity testing, flow measurement, recording and reporting obligations of this Regulation, in accordance with the General Effluent Monitoring Regulation.

(4) Subsection 4 (9) of the General Effluent Monitoring Regulation does not apply with respect to a refinery named in subsection (1).

(5) An obligation on a direct discharger to do a thing under this Regulation is discharged if another person has done it on the direct discharger's behalf.

(6) Each direct discharger shall notify the Director in writing of any change of name or ownership of its refinery within thirty days after the day this Regula-

tion comes into force or within thirty days after any such change. O. Reg. 696/88, s. 2.

3. Section 4 of the said Regulation is revoked and the following substituted therefor:

4.—(1) Each direct discharger shall establish the following sampling points:

1. An emergency overflow effluent sampling point on each emergency overflow effluent stream.
2. A landfarm leachate sampling point on each landfarm leachate effluent stream.
3. A once-through cooling water sampling point on each once-through cooling water effluent stream.
4. A process effluent sampling point on each process effluent stream.
5. A storm water sampling point on each storm water effluent stream.

(2) Each direct discharger shall use the sampling points established under subsection (1) for all sampling required by this Regulation, except that a direct discharger may use alternate sampling points where that is acceptable to the Director. O. Reg. 696/88, s. 3.

4. Subsection 6 (2) of the said Regulation is revoked and the following substituted therefor:

(2) Subsection (1) does not apply in respect of any day in which a sufficient volume of sample cannot be collected because of the collection of inspection samples. O. Reg. 696/88, s. 4.

5. Section 8 of the said Regulation is amended by adding thereto the following subsection:

(4) Despite subsection (1), a direct discharger is only required to fulfil the requirements of that subsection in four consecutive quarters during the period from the 1st day of December, 1988 to the 1st day of December, 1989. O. Reg. 696/88, s. 5.

6. Section 9 of the said Regulation is amended by adding thereto the following subsection:

(3) Each direct discharger shall collect each set of samples required to be collected under subsection (1) not earlier than two weeks after the previous collection. O. Reg. 696/88, s. 6.

7. Subsection 11 (1) of the said Regulation is revoked and the following substituted therefor:

(1) During each emergency overflow, each direct discharger shall collect a set of samples sufficient to perform all of the analyses required by subsection (3) from each emergency overflow effluent sampling point on each affected emergency overflow effluent stream of that discharger. O. Reg. 696/88, s. 7.

8. Subsections 12 (1) and (3) of the said Regulation are revoked and the following substituted therefor:

(1) At least once in each year, each direct discharger shall collect a set of samples sufficient to perform all of the analyses required by subsection (2) from each landfarm leachate sampling point of that discharger during a discharge of landfarm leachate. O. Reg. 696/88, s. 8, *part*.

(3) At least once during each discharge of landfarm leachate, each direct discharger shall collect a set of samples sufficient to perform all of the analyses required by subsection (4) from each landfarm leachate sampling point of that discharger. O. Reg. 696/88, s. 8, *part*.

9. Subsection 13 (2) of the said Regulation is revoked and the following substituted therefor:

(2) Each direct discharger shall prepare each travelling spiked blank sample required to be analyzed by this section with a standard solution containing at least the parameters to be analyzed for. O. Reg. 696/88, s. 9.

10. Section 14 of the said Regulation is revoked and the following substituted therefor:

14.—(1) With respect to analyses required under this Regulation, where there are consistently less than fourteen samples in each analytical run, each direct discharger may process the quality control samples referred to in subsection 4 (10) of the General Effluent Monitoring Regulation once before the analysis of any samples and once after the processing of every fourteen samples in consecutive analytical runs, instead of at the times specified in that subsection.

(2) Each direct discharger shall analyze each set of quality control samples referred to in subsection (1) together in one analytical run. O. Reg. 696/88, s. 10.

11.—(1) Subsections 15 (2) to (5) of the said Regulation are revoked and the following substituted therefor:

(2) If the tests performed under subsection (1) in three consecutive months result in mortality for no more than two out of ten fish at all effluent concentrations, a direct discharger may thereafter collect the samples and perform the tests required by subsection (1) on a 100 per cent undiluted sample only.

(3) If a test performed under subsection (2) results in mortality for more than two out of ten fish, subsection (2) ceases to apply and continues not to apply until the tests performed under subsection (1) in a further three consecutive months result in mortality for no more than two out of ten fish at all effluent concentrations.

THE ONTARIO HIGHWAY TRANSPORT BOARD

PUBLIC NOTICE

THE MOTOR VEHICLE TRANSPORT ACT, 1987, PART II TRUCK APPLICATIONS

The Applicants listed herein have applied for licences to operate an extra-provincial truck undertaking under Part II of the Motor Vehicle Transport Act, 1987. The Applications were published in the Ontario Gazettes of **March 26th, April 2nd, April 9th, April 23th, April 30th, May 7th, May 14th, May 28th, June 4th, June 11th, June 18th, June 25th, July 2nd, July 9th, July 16th and July 23rd, 1988.**

Notices of Objection and written evidence were filed on these applications, within the time prescribed, by interested persons. The Ontario Highway Transport Board has considered the evidence filed and is satisfied that in the absence of evidence to the contrary the operation of the extra-provincial truck undertaking in respect of which the licences are sought would likely be detrimental to the public interest. Any other interested persons who may wish to make representations or wish to file an objection and written evidence shall do so at least fifteen (15) days before the date set for hearing.

TAKE NOTICE that if any person who is a party to these proceedings does not attend at the hearing, the Board may proceed in his or her absence

and such person is not entitled to any further notice in the proceedings.

Accordingly, the Board has directed that public hearings be held at the Board's Chambers, Britannica House, 151 Bloor Street West, 10th Floor, Toronto, Ontario as indicated hereunder:

For further information with respect to these hearings, members of the public are advised to contact the Secretary of the Board.

MOTOR VEHICLE TRANSPORT ACT, 1987

M.V.T.A. 1987, PART II, TRUCK APPLICATIONS

The following applicants have made applications for extra-provincial operating licences.

Recently, the Divisional Court of Ontario determined that the Ontario Highway Transport Board is the provincial transport board under the Act, and therefore for greater certainty, notice of these applications are re-published herein with reference only to the applicant's name, file number and date of earlier publication.

Any interested person may file an objection within 15 days and written evidence within 25 days of the date of this publication that satisfies the Board that, in the absence of evidence to the contrary, the operation of the undertaking in respect of which the licence is sought would likely be detrimental to the public interest. Persons who have already filed either a notice of objection or written evidence on any particular application noted below need not re-submit this material, and will be considered parties to the proceeding.

For further information with respect to these applications, members of the public are advised to contact the Secretary of the Board.

MOTOR VEHICLE TRANSPORT ACT, 1987, PART 11, TRUCK APPLICATIONS

The following applicants have made applications for extra-provincial operating licences.

Recently, the Divisional Court of Ontario determined that the Ontario Highway Transport Board is the provincial transport board under the Act, and therefore for greater certainty, notice of these applications are re-published herein with reference only to the applicant's name, file number and date of earlier publication.

Any interested person may file an objection within 15 days and written evidence within 25 days of the date of this publication that satisfies the Board that, in the absence of evidence to the contrary, the operation of the undertaking in respect of which the licence is sought would likely be detrimental to the public interest. Persons who have already filed either a notice of objection or written evidence on any particular application noted below need not re-submit this material, and will be considered parties to the proceeding.

For further information with respect to these applications, members of the public are advised to contact the Secretary of the Board.

POLICY STATEMENT

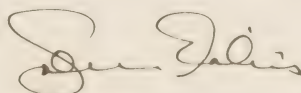

Flood Plain Planning

**A statement of Ontario Government
policy issued under the authority of
Section 3 of the Planning Act 1983**

Approved by the
Lieutenant Governor in Council
Order in Council No. 1946/88
August 11, 1988

Vincent G. Kerrio
Minister of
Natural Resources

John Eakins
Minister of
Municipal Affairs

Purpose

This document is prepared under the authority of section 3 of the Planning Act, 1983, and is the Province of Ontario's policy statement on planning for flood plain lands.

Interpretation

This provincial policy statement:

- is issued jointly by the Minister of Natural Resources and the Minister of Municipal Affairs under the Planning Act, 1983;
- does not supersede or take priority over other policy statements issued under section 3 of the Planning Act, 1983, or any other policy approved by the Lieutenant Governor in Council; and
- replaces the "Flood Plain Criteria—A Policy Statement of the Government of Ontario on Planning for Flood Plain Lands" issued in September 1982.

Background

The need to manage flood plain lands was emphasized in 1954 when Hurricane Hazel struck the Metropolitan Toronto area resulting in the loss of 81 lives and approximately \$75 million in property and other damages.

Since that time, many flood prone areas have been protected throughout Ontario by remedial measures and efforts have been made to minimize the intrusion of new development into the more hazardous portions of flood plains.

Although flood plains have been actively managed for more than 30 years, problem areas still exist. Since the mid-1970s, major floods resulting in millions of dollars of damages have occurred in Cambridge (1974), Dover Township (1979), Field Township (1979), Nipissing River/French River area (1979), Port Hope (1980), Windsor (1981), Chatham, Dover, Dresden, Huntsville, and Fort Albany (1985), and Winisk (1986).

In 1985, Ontario experienced a record number of floods for a given year. Province wide, approximately 2,000 homes were flooded or made inaccessible by high water levels and 11,000 hectares of agricultural land were flooded.

In addition to the loss of life, an immeasurable cost, and direct costs from damages to buildings and structures, indirect costs and social disruption have also been extensive in certain areas. For example, after the 1979 flood in the Township of Field, many of the local residents had to be relocated because of the severe damage and destruction to their homes. The mental anguish of being flooded and the resulting social disruption of relocation are real but often overlooked aspects of flood susceptibility.

Therefore, in the planning and management of flood plain lands, there is a government role which can be summarized as follows:

- to provide order and equity in the use/non-use of flood plain lands; and
- to protect society, including all levels of government, from being forced to bear unreasonable social and economic burdens of unwise individual choices.

In Ontario, flood plain management consists of a combination of 3 components:

- prevention
 - land use planning and regulation of development
- protection
 - structural/acquisition measures
- emergency response
 - flood warning and combat/disaster relief

a) Prevention

The orderly planning of land use and the regulation of development represent the preventative approach to flood plain management and provide the focus for this policy statement. This approach is the most cost effective in helping to ensure *new* buildings and structures are not flood susceptible and that upstream and downstream problems do not occur as a result of new development.

The Ministry of Municipal Affairs, and the municipalities of Ontario, through the Planning Act, 1983, are responsible for land use planning in the Province. The Ministry of Natural Resources and the Conservation Authorities of Ontario act in an advisory capacity to the Ministry of Municipal Affairs and the municipalities on land use matters related to flooding.

The Ministry of Natural Resources, through the administration of the Conservation Authorities Act, R.S.O. 1980, together with the Conservation Authorities, have traditionally played the foremost role in the overall management of flood plains and will continue in this regard. Through regulations, Conservation Authorities review development proposals from the technical viewpoint of flood susceptibility and upstream/downstream implications. Where Conservation Authorities do not exist, the Ministry of Natural Resources is responsible for the implementation of flood plain management policies and practices.

The preventative approach may include the acquisition of undeveloped flood plain lands in certain situations. Such acquisition is usually only considered, however, if other resource management objectives are to be achieved.

b) Protection

The protection approach involves the construction of dams, dykes, channels, diversions and other flood control works. These works are designed to provide protection to *existing* development located in the flood plain.

In some instances though, a cost-benefit analysis may indicate that acquisition and the removal of buildings from the flood plain is more appropriate than the construction of protective works.

c) Emergency Responses

The Ministry of Natural Resources, in co-operation with the Conservation Authorities of Ontario, maintains a streamflow forecast centre which is linked to a network of weather stations, stream gauges, and rain gauges throughout the Province. Advance warning of an impending flood enables municipalities and other government agencies to put into operation their emergency action plans for evacuating people and moveable property from flood susceptible areas.

Various levels of government have historically provided disaster relief and assistance to flood victims after major flood events. However, government subsidies do not cover all losses. They specifically exclude such items as secondary residences, landscaping, recreational vehicles, and non-essential furniture/appliances. Also, flood insurance on private properties in flood risk areas is not readily available at economical rates.

Although this approach assists in reducing the threat of life and some property losses, it does not prevent flooding and the bulk of related damages from recurring.

Each of the three components is designed to address different aspects of flood plain management. Over the long term, however, the preventative approach is the preferred approach to flood plain management. By effective land use planning and regulation of development, problems relating to flooding can be prevented or minimized before they occur. It is in this context that this policy statement takes effect.

Definitions

For the purpose of this policy statement,

- **Development** means the construction, erection or placing of a building or structure of any kind or the making of an addition or alteration to a building or structure that has the effect of increasing the size or usability thereof, and includes such related activities as site grading and the placing or dumping of fill.
- **Fill, Construction, and Alteration to Waterways Regulation** means a regulation passed pursuant to Section 28 of the Conservation Authorities Act, R.S.O. 1980, or its successors, whereby a Conservation Authority may, among other matters, regulate:
 - the straightening, changing, diverting or interfering in any way with the existing channel of a river, creek, stream or watercourse;
 - the construction of any building or structure in or on a pond or swamp or in any area susceptible to flooding; and
 - the placing or dumping of fill of any kind in any defined part of the area over which the Conservation Authority has jurisdiction in which, in the opinion of the Conservation Authority, the control of flooding or pollution or the conservation of land may be affected.
- **Flood** means a temporary rise in the water level resulting in the inundation of areas adjacent to a watercourse not ordinarily covered by water.

- **Flood Fringe** means the outer portion of the flood plain between the floodway and the limit of the regulatory flood. Flood depths and velocities are generally less severe in the flood fringe than those experienced in the floodway.
- **Flood Plain** means the area, usually low lands, adjoining a watercourse which has been, or may be covered by flood water.
- **Floodproofing** means a combination of structural changes and/or adjustments incorporated into the basic design and/or construction or alteration of individual buildings, structures or properties subject to flooding so as to reduce or eliminate flood damages.
- **Floodway** means the channel of a watercourse and that inner portion of the flood plain where flood depths and velocities are generally higher than those experienced in the flood fringe. The floodway represents that area required for the safe passage of flood flow and/or that area where flood depths and/or velocities are considered to be such that they pose a potential threat to life and/or property damage.
- **Hazardous Substances** means substances which individually, or in combination with other substances are normally considered to pose a danger to public health, safety and the environment. These substances generally include a wide range of materials that are toxic, ignitable, corrosive, reactive, radioactive or pathological.
- **Level of Protection** means a specified level, elevation and/or flow velocity to which new development must not be susceptible to flood related damage.
- **Local Conditions** means the physical and hydrologic characteristics of an area as they input to and may affect flood plain management.
- **Observed Flood Event** means a flood actually experienced in a particular watershed or portion thereof.

Subject to the policies contained in this document, and the availability of sufficient documentation, an observed flood event may be used for regulatory purposes as follows:

—to define flood plain limits for that specific area where ice jams have historically occurred;

or

—to define flood plain limits for an entire watershed by transposing or extending data derived from the observed flood event with reference to the physical and land use characteristics of the entire watershed. The transposing of data is considered acceptable where the evidence suggests that the flood event could have potentially occurred over other portions of the watershed.

- **100 Year Flood** means that flood, based on analysis of precipitation, snow melt, or a combination thereof, having a return period of 100 years on average, or having a 1% chance of occurring or being exceeded in any given year.
- **One Zone Concept** means the approach whereby the entire flood plain, as defined by the regulatory flood, is treated as one unit, and all development is prohibited or restricted.
- **Regulatory Flood** means the approved standard(s) used in a particular watershed to define the limit of the flood plain for regulatory purposes.

- **Restricted** means that new development is limited to:
 - flood and/or erosion control structures
 - facilities which by their nature must locate near water or traverse watercourses
 - ancillary facilities of an adjacent land use which are of a passive, non-structural nature and do not adversely affect the ability of the flood plain to pass flood waters.
- **Special Policy Area** means an area within a community that has historically existed in the flood plain and where strict adherence to certain Province-wide policies concerning new development would result in social and economic hardships for the community. As a result, site specific policies are formulated and applied within the defined limits of the special policy area.
- **Storm Centred Event** means a major storm of record used for regulatory purposes. The rainfall actually experienced during a major storm event can be transposed over another watershed and when combined with the local conditions, flood plain limits can be established. This centering concept is considered acceptable where the evidence suggests that the storm event could have potentially occurred over other watersheds in the general area.

In Ontario, two storm centred events are used for regulatory purposes:

- the Hurricane Hazel storm (1954); and
- the Timmins storm (1961).
- **Two Zone Concept** means the approach whereby certain areas of the flood plain are considered to be less hazardous than others such that development potentially could safely occur. The flood fringe defines that portion of the flood plain where development may be permitted, subject to appropriate floodproofing. The floodway defines that portion of the flood plain wherein development is prohibited or restricted.
- **Watershed** means all lands drained by a river or stream and its tributaries (Conservation Authorities Act, R.S.O. 1980).

Basis of Policy

The provincial policies contained in this document have been developed based on the following objectives and principles:

Objectives

- (1) to prevent loss of life;
- (2) to minimize property damage and social disruption; and
- (3) to encourage a co-ordinated approach to the use of the land and the management of water.

Principles

- (1) effective flood plain management can only occur on a watershed basis with due consideration given to the upstream/downstream and cumulative effects of development;
- (2) local conditions (physical, environmental, economic, and social characteristics) vary from watershed to watershed and, accordingly, must be taken into account for the planning and managing of flood plain lands;
- (3) the degree of risk (threat of life and property damage) can vary within the flood plain of a watershed and from watershed to watershed; some portions may be too hazardous for development while the potential for development to safely occur may exist for other portions;
- (4) new development susceptible to flood damages or which will cause or increase flood related damages to existing uses and land must not be permitted to occur; however, some communities have historically located in the flood plain and as a result, special consideration may be required to provide for their continued viability; and
- (5) flood plain management and land use planning are distinct yet related processes that require overall co-ordination on the part of municipalities, Conservation Authorities, the Ministry of Natural Resources and the Ministry of Municipal Affairs.

Policies

(1) General

It is the policy of the Province of Ontario that:

- 1.1 All land use planning and resource management bodies within the Province have regard to the implications of their actions respecting the creation of new or the aggravation of existing flood plain management problems.
- 1.2 Municipalities and planning boards¹ recognize flood susceptibility at the various stages of the land use planning process for which they have jurisdiction.

(2) Regulatory Flood Standard

It is the policy of the Province of Ontario that:

- 2.1 The flood standards used to define flood plain limits for regulatory purposes are:
 - (a) the flood resulting from one of the following storm centred events:
 - Hurricane Hazel storm (1954)
 - Timmins storm (1961);

¹ "planning board" refers to those planning boards established by the Minister of Municipal Affairs, in accordance with section (9) or (10) of the Planning Act, 1983.

— Approximate boundaries of the Regulatory Floods

- (b) 100 year flood; and
 - (c) an observed flood event, subject to the approval of the Minister of Natural Resources.
- 2.2 The 100 year flood is the minimum acceptable regulatory flood standard.
- 2.3 For those watersheds with a regulatory flood standard greater than the minimum acceptable (See Figure 1), the option exists for municipalities and planning boards to apply to the Minister of Natural Resources, in accordance with procedures established, to change the standard, subject to the following overriding conditions:
- (a) changes to the existing regulatory flood standard will only be considered with the support of a significant majority of municipalities and/or planning boards within the watershed, in consultation with the local Conservation Authority or Ministry of Natural Resources, where Conservation Authorities do not exist; and
 - (b) the lowering of the existing regulatory flood standard where the past history of flooding reveals a higher level is more appropriate will not be considered.
- 2.4 Where flooding is experienced in excess of the existing regulatory flood standard, the Minister of Natural Resources may require the regulatory flood standard to be modified to reflect the observed flood event.

(3) Official Plans

It is the policy of the Province of Ontario that:

- 3.1 Municipalities and planning boards show and/or describe flood plain lands in their official plans and incorporate policies to address new development consistent with this policy statement.
- 3.2 Municipalities and planning boards, in consultation with the local Conservation Authority or Ministry of Natural Resources, where no Conservation Authority exists, include in their official plans:
 - (a) policies whereby uses permitted in flood plains are cognizant of flood susceptibility and flood risk;
 - (b) policies whereby no new buildings or structures are permitted which are susceptible to flood related damages or will cause adverse impacts to existing upstream or downstream development or lands;
 - (c) policies addressing additions or alterations to existing buildings or structures and replacement of buildings or structures located in flood plains; and
 - (d) policies addressing such public and private works that must locate in flood plains by nature of their use.
- 3.3 Municipalities and planning boards identify in their official plans, the planning controls required to give effect to the policies identified in section 3.2.
- 3.4 Where no official plan exists, the zoning document affecting the area contain provisions to reflect this policy statement.

(4) One Zone Concept

It is the policy of the Province of Ontario that subject to policies (5) and (6):

- 4.1 The flood plain will consist of one zone, defined by the regulatory flood standard (see Figure 2).
- 4.2 New development in the flood plain is to be prohibited or restricted.
- 4.3 Where the one zone concept is applied, municipalities and planning boards include policies in their official plans that explain the intent of the one zone concept.
- 4.4 Where the one zone concept is applied, the flood plain be appropriately zoned in conformity with the official plan designation, to reflect its prohibitive or restrictive use.

(5) Two Zone Concept

It is the policy of the Province of Ontario that:

- 5.1 For portions of flood plains that could potentially be safely developed with no adverse impacts, the Conservation Authorities in Ontario, or where no Conservation Authorities exist, the Ministry of Natural Resources, in co-operation with the watershed municipalities have the option of selective application of the two zone (floodway—flood fringe) concept (see Figure 3).
- 5.2 New development in the floodway is to be prohibited or restricted.
- 5.3 The extent of the floodway is to be determined based on local watershed conditions, such as critical flood depth and velocity, existing and proposed development, and the potential for upstream and downstream impacts.
- 5.4 New development that may be permitted in the flood fringe be protected to the level of the regulatory flood.
- 5.5 Where the two zone concept is proposed to be applied or is considered to be a plausible option, municipalities include policies in their official plans that explain the intent of the two zone concept and development potential of the flood fringe versus the floodway.
- 5.6 Where the two zone concept is applied, the flood fringe be zoned in conformity with the official plan designation, and the flood hazard and requirements for floodproofing be recognized in the zoning document.
- 5.7 Where the two zone concept is applied, the floodway be appropriately zoned to reflect its prohibitive or restrictive use.

(6) Special Policy Area Concept

It is the policy of the Province of Ontario that:

- 6.1 Where strict adherence to policies (4) and/or (5) is not feasible, the concept of special policy area status is recognized as a possible option for flood prone communities or portions thereof. Municipalities may apply for special policy area status, in accordance with established procedures, and controlled development may be permitted once such status is obtained.

ONE-ZONE CONCEPT

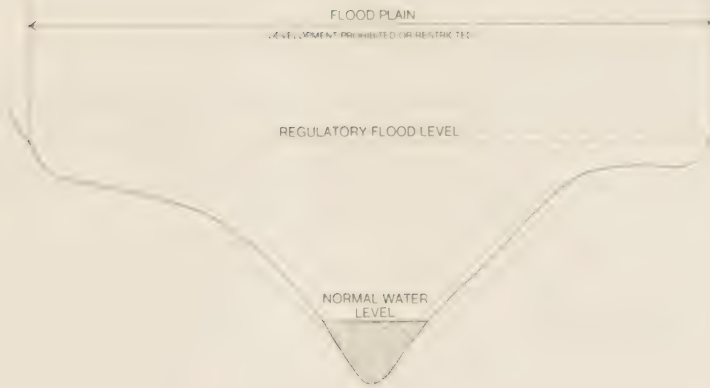

Figure 2

TWO-ZONE FLOODWAY-FLOOD FRINGE CONCEPT

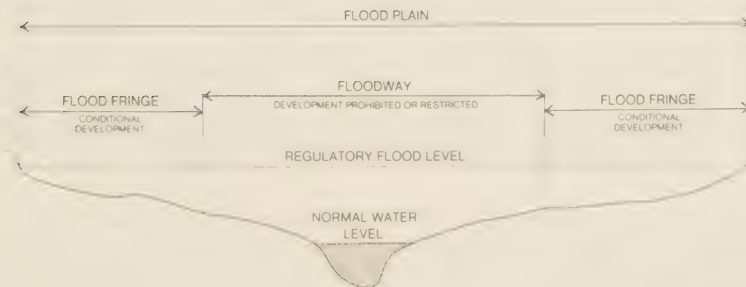

Figure 3

- 6.2 Municipalities delineate special policy areas in their official plans and include policies indicating the circumstances under which new development may be permitted and identifying the minimum acceptable level of protection required for new development.

(7) Floodproofing

It is the policy of the Province of Ontario that:

- 7.1 Any new development permitted in the flood plain, in accordance with this policy statement, be protected by acceptable floodproofing actions or measures.
- 7.2 Ingress/egress for new buildings be such that vehicular and pedestrian movement is not prevented during times of flooding.

(8) Public Safety

It is the policy of the Province of Ontario that, notwithstanding Policies (3) to (7) inclusive:

- 8.1 New development not be permitted to locate in the flood plain where the use is:

- (a) associated with the manufacture, storage, disposal and/or consumption of hazardous substances or the treatment, collection and disposal of sewage, which would pose an unacceptable threat to public safety if they were to escape their normal containment/use as a result of flooding or failure of floodproofing measures;
- (b) associated with institutional services, such as hospitals, nursing homes and schools, which would pose a significant threat to the safety of the inhabitants (e.g. the sick, the elderly, the disabled or the young), if involved in an emergency evacuation situation as a result of flooding or failure of floodproofing measures; and
- (c) associated with services such as those provided by fire, police and ambulance stations and electrical substations, which would be impaired during a flood emergency as a result of flooding or failure of floodproofing measures.

- 8.2 Where new development identified in 8.1 is not considered to pose an unacceptable risk to public safety, a higher level of flood protection and/or additional floodproofing precautions above the regulatory flood level, may still be required due to the sensitive nature of the development.

Implementation

- In exercising any authority that affects any planning matter, the council of every municipality, every local board, every Minister of the Crown and every ministry, board, commission or agency of the government, including the Ontario Municipal Board and Ontario Hydro, shall have regard to this policy statement as required under section 3 of the Planning Act, 1983.

- The Ministry of Natural Resources and the Ministry of Municipal Affairs will develop guidelines for the implementation of this policy statement, including the administration of the Planning Act, 1983, as it relates to flood plain lands.
- The Ministry of Natural Resources will develop technical guidelines for the calculation of flood lines and the mapping of flood plains.
- The Ministry of Natural Resources, in co-operation with the Ministry of Municipal Affairs, will develop procedures to be followed for applying to change the regulatory flood standard for a watershed.
- The Ministry of Natural Resources and the Ministry of Municipal Affairs will develop procedures to be followed in applying for special policy area status.
- The Ministry of Natural Resources, in co-operation with the Ministry of Municipal Affairs and the Ministry of Housing and other appropriate agencies, will identify acceptable types of floodproofing and their application to different types of land use.
- The Conservation Authorities, where they exist, are responsible for plan input and review related to flood plain matters and in this regard will:
 - make available any existing mapping, flood data or studies and provide technical assistance to any government body or planning authority, in particular municipalities and planning boards, and assist municipalities and planning boards to incorporate the intent of the provincial policy statement for flood plain management into the land use planning process and appropriate planning documents;
 - provide comments to review and approval agencies on proposed planning actions that may have implications on flood plain management;
 - make representation or provide technical expertise to the Ontario Municipal Board or other appeal bodies, where a matter related to this policy statement may be an issue;
 - consult with ministries, public agencies, boards, authorities, and municipalities on matters pertaining to flood plain management, as may be appropriate; and
 - inform and educate the general public on the principles and practices of flood plain management and provide information on the characteristics and consequences of a flood.

Where Conservation Authorities do not exist, the Ministry of Natural Resources is responsible for plan input and review related to flood plain matters.

- The Conservation Authorities will administer the provisions of the Conservation Authorities Act, R.S.O., 1980, and Fill, Construction² and Alteration to Waterways Regulations passed pursuant to Section 28 of the Act, or successors thereto, to assist in the implementation of this policy statement.

² the "construction" component of Conservation Authority regulations is applied to areas draining 125 hectares or greater. Areas less than 125 hectares are considered "local drainage" and thus are the responsibility of the local municipalities.

- The Ministry of Natural Resources, in conjunction with the Federal government will continue to administer the Canada-Ontario Flood Damage Reduction Program through the Conservation Authorities and the municipalities. This includes the carrying out of flood plain mapping and flood studies, and the preparation of information maps geared to the general public depicting flood susceptible areas.
- The Ministry of Municipal Affairs and municipalities with delegated approval authority from the Minister will ensure that all municipal planning documents to be reviewed or approved, have had regard to this policy statement.
- When an existing official plan or zoning by-law/order comes up for review, regard will be had for this policy statement.
- Municipalities, with input from Conservation Authorities, or the Ministry of Natural Resources where Conservation Authorities do not exist, will put in place planning controls necessary to implement flood plain provisions in official plans (such as zoning, site plan control).
- The Ministry of Natural Resources and the Ministry of Municipal Affairs will undertake periodic research programs to investigate and update planning implementation and flood plain management techniques.
- The Ministry of Natural Resources and the Ministry of Municipal Affairs, in co-operation with the Conservation Authorities, will administer this policy statement, as well as advise and explain its content and application to municipalities, planning boards, and other agencies.

DÉCLARATION DE PRINCIPES SUR LA PLANIFICATION RELATIVE À LA PLAINE INONDABLE

Objectif

Ce document est rédigé selon les dispositions de l'article 3 de la Loi de 1983 sur l'aménagement du territoire et il constitue une déclaration de principes de la part de la province de l'Ontario sur la planification relativement à la plaine inondable.

Interprétation

Cette déclaration de principes :

- est publiée conjointement par le ministère des Richesses naturelles et le ministère des Affaires municipales selon les dispositions de la *Loi de 1983 sur l'aménagement du territoire*;
- ne remplace, ni n'a la priorité, sur toute autre déclaration de principes diffusée selon l'article 3 de la *Loi de 1983 sur l'aménagement du territoire*, ou lieutenant-gouverneur en conseil; et
- remplace le document «Critères pour les plaines d'inondation—Énoncé de politique du gouvernement de l'Ontario sur la planification des plaines d'inondation», publié en septembre 1982.

Historique

La nécessité de gérer les terres inondables est clairement apparue en 1954, lorsque la tempête Hazel se déchaîna dans la région de Toronto et causa 81 morts et environ 75 millions de dollars de dégâts matériels et autres.

Depuis lors, bien des régions susceptibles d'être inondées ont été protégées partout en Ontario au moyen d'ouvrages de protection et on a tenté de minimiser les nouvelles constructions dans les parties les plus exposées de la plaine inondable.

Bien qu'on s'occupe activement de la plaine inondable depuis plus de 30 ans, il reste encore des zones très exposées. Depuis le milieu des années 1970, d'importantes crues, qui ont causé des millions de dollars de dégâts, se sont produites à Cambridge (1974), dans le canton de Dover (1979), dans le canton de Field (1979), dans le bassin de la rivière Nipissing/rivière des Français (1979), à Port Hope (1980), à Windsor (1981), à Chatham, Dover, Dresden, Huntsville et Fort Albany (1985), et à Winisk (1986).

En 1985, l'Ontario a subi un nombre record de crues au cours de la même année. Dans toute la province, environ 2 000 maisons ont été inondées ou rendues inaccessibles à la suite de la montée des eaux et 11 000 hectares de terres agricoles ont été inondées.

En plus de la perte inestimable de vies humaines, les coûts directs des dégâts aux ouvrages d'art et aux bâtiments et les coûts indirects, ainsi que les bouleversements sociaux dus aux crues, ont été considérables dans certaines parties de la province. Par exemple, à la suite de l'inondation de la ville de Field, en 1979, de nombreux résidents ont dû être déplacés, leurs maisons ayant été gravement endommagées ou détruites. L'angoisse ressentie par la population lors des inondations et les bouleversements sociaux qui résultent d'un déménagement forcé sont des aspects des plus réels des crues, bien qu'ils soient souvent ignorés.

Par conséquent, la planification et la gestion des terres inondables confèrent le rôle suivant au gouvernement :

- assurer l'ordre et la justice en ce qui concerne l'utilisation ou la non-utilisation des terres inondables; et
- protéger la société, y compris tous les échelons de gouvernement, du trop lourd fardeau économique et social qu'entraîneraient des choix individuels malencontreux.

En Ontario, la gestion de la plaine inondable réunit trois éléments :

- Prévention
 - planification de l'utilisation des terres et réglementation des aménagements
- Protection
 - ouvrages de protection/acquisitions
- Mesures d'urgence
 - alerte et lutte contre les inondations/secours aux victimes

a) Prévention

La planification de l'utilisation des terres et la réglementation des aménagements sont une approche préventive à la gestion de la plaine inondable et elles sont au centre même de la présente déclaration de principes. Cette approche est la plus efficace pour aider à faire en sorte que les *nouveaux* édifices et ouvrages d'art ne soient pas exposés aux dégâts causés par les crues et qu'ils ne créent aucune difficulté en amont ou en aval.

Le ministère des Affaires municipales et les municipalités de l'Ontario, par le biais de la *Loi de 1983 sur l'aménagement du territoire*, sont chargés de planifier l'utilisation des terres partout dans la province. Le ministère des Richesses naturelles et les offices de protection de la nature de l'Ontario conseillent le ministère des Affaires municipales et les municipalités en ce qui concerne les questions d'utilisation des terres en ce qui a trait aux inondations.

Le ministère des Richesses naturelles, par le biais de la *Loi sur les offices de protection de la nature*, L.R.O. 1980, ainsi que les offices de protection de la nature eux-mêmes, ont de tout temps joué le principal rôle dans la gestion d'ensemble des terres inondables et continueront à jouer ce rôle. Grâce aux règlements, les offices de protection de la nature étudient les propositions d'aménagement sous l'angle technique de la susceptibilité aux crues et des conséquences en aval et en amont. Lorsqu'il n'existe pas d'office de protection de la nature dans une région donnée, le ministère des Richesses naturelles est chargé de l'application des directives et pratiques de gestion des terres inondables.

Dans certains cas, la prévention peut comprendre l'acquisition de terres inondables non aménagées. Toutefois, ceci n'est envisagé d'ordinaire que lorsqu'il s'agit d'atteindre d'autres objectifs de gestion des ressources.

b) Protection

La protection comprend la construction de barrages, de digues, de canaux, de détournement et autres ouvrages d'art permettant de contrôler les crues. Ces ouvrages sont conçus pour protéger les aménagements *existants* situés dans la plaine onondable.

Dans certains cas, cependant, une analyse de rentabilité peut révéler que l'acquisition et l'enlèvement d'édifices sont plus indiqués que la construction d'ouvrages de protection.

c) Mesures d'urgence

Le ministère des Richesses naturelles, en collaboration avec les offices de protection de la nature de l'Ontario, exploite un centre de prévision des débits relié à un réseau de stations météorologiques, de jaugeurs de cours d'eau et de pluviomètres disposés la grandeur de la province. Avertis d'une crue possible, les municipalités et les organismes gouvernementaux peuvent appliquer leurs plans d'urgence pour l'évacuation des résidents et des biens meubles des zones menacées.

De tout temps, les trois échelons de gouvernement ont offert des secours aux victimes de crues importantes. Toutefois, ces secours ne couvrent pas toutes les pertes. Les résidences secondaires, le paysagement, les véhicules de loisirs, le mobilier et les appareils ménagers non essentiels en sont exclus. D'autre part, le coût de l'assurance-inondation des propriétés privées situées sur les terres inondables demeure élevé.

Bien que cette approche permette de réduire les risques de décès et certains dégâts matériels, elle n'empêche pas les crues et la plus grande partie des dommages qu'elles entraînent de se produire.

Chacun des trois éléments est conçu pour traiter de divers aspects de la gestion de la plaine inondable. À long terme, toutefois, l'approche préventive est la plus efficace et, en planifiant comme il convient l'utilisation des terres et en réglementant les aménagements, les difficultés qu'entraînent les crues peuvent être prévenues ou minimisées avant qu'elles se produisent. C'est dans ce contexte que la présente déclaration de principes prend toute son importance.

Définitions

Dans le cadre de la présente déclaration :

- **Aménagement** signifie toute construction, emplacement ou érection d'édifice, ou structure de quelque espèce que ce soit, ou l'addition ou la modification d'édifices ou structures, susceptibles d'en accroître l'importance ou l'utilisation; ce terme couvre les activités connexes telles que le terrassement et la mise en place ou le dépôt de remblai.
- **Règlements relatifs aux remblais, construction et altération des cours d'eau** signifie les règlements afférents à l'article 28 de la Loi sur les offices de protection de la

nature, L.R.O. 1980, ou toute loi postérieure, par lesquels les offices de protection de la nature peuvent réglementer, entre autre:

- le redressement, le changement, le détournement ou la modification d'une façon quelconque de l'écoulement d'une rivière, d'un ruisseau, d'un cours d'eau ou d'une voie d'eau;
- l'érection d'un édifice ou d'une structure quelconque dans une mare ou un marais ou sur une surface exposée aux inondations; et
- l'emplacement ou le déversement de matériaux de remblais quelconque dans une partie donnée d'une surface dont un office de protection a la responsabilité et dans laquelle, selon cet office, le contrôle des crues, de la pollution ou de la protection de la nature peut être touché.
- **Inondation**, ou crue, signifie une montée temporaire du niveau des eaux résultant en l'inondation des surfaces adjacentes à un cours d'eau et non habituellement recouvertes d'eau.
- **Zone périphérique** signifie la partie de la plaine inondable comprise entre le canal de crue et les limites de la zone de crue réglementée. La profondeur et la rapidité du débit sont généralement moins prononcées dans la zone périphérique que dans le canal de crue.
- **Plaine inondable** signifie les surfaces riveraines d'un cours d'eau, généralement peu surélevées, et qui ont été recouvertes lors d'une crue, ou sont susceptibles de l'être.
- **Substances dangereuses** signifie une substance qui, par elle-même ou associée à d'autres substances, présente normalement des dangers à la santé ou à la sécurité publiques et à l'environnement. Ces substances comprennent généralement toute une gamme de produits toxiques, inflammables, corrosifs, réactifs, radioactifs ou pathologiques.
- **Protection contre les inondations** signifie une combinaison de modifications structurelles et (ou) d'ajustements incorporés à une construction ou à un concept, ou une modification d'édifices, ouvrages ou propriétés sujets aux inondations, de façon à réduire ou éliminer les dommages dus aux crues.
- **Canal de crue** signifie le chenal d'une voie d'eau et la partie centrale de la plaine inondable dans laquelle la profondeur et la rapidité du courant sont généralement plus élevées que dans la zone périphérique. Le canal de crue est la zone nécessaire à l'écoulement normal de la crue et celle où la profondeur et la rapidité du courant sont considérées comme pouvant mettre en danger la vie humaine ou les biens.
- **Niveau de protection** signifie un niveau, une élévation et (ou) une vitesse du débit qui ne doit pas menacer tout nouvel aménagement.
- **Inondation observée** signifie une crue qui a en fait eu lieu dans un bassin donné ou une partie de ce bassin.
- **Conditions locales** signifie les caractéristiques physiques ou hydrologiques d'une région qui auraient une incidence sur la gestion de la plaine inondable.

Sous réserve des principes exposés ici, et des données techniques dont on dispose, on peut se baser sur une inondation observée aux fins de réglementation comme suit :

- pour définir les limites de la plaine inondable dans la région où la crue s'est produite à l'aide des données de crue observée;

OU

—pour définir les limites de la plaine inondable pour l'ensemble d'un bassin en transposant ou en interpolant les données tirées de l'inondation observée en tenant compte de la géographie et de l'utilisation des terres de l'ensemble du bassin. La transposition des données est acceptable lorsque l'on peut supposer que l'inondation aurait pu se produire dans d'autres parties du bassin.

- **Crue séculaire** signifie une crue qui, selon l'analyse des précipitations, de la fonte des neiges, des banquises ou d'une combinaison de ces conditions météorologiques, se produit tous les 100 ans ou a une probabilité de 1 pour 100 de se produire en une année donnée.
- **Concept de la zone unique** signifie une politique selon laquelle la totalité de la plaine inondable, telle que la définit la zone de crue réglementée, est considérée comme une seule zone dans laquelle tout aménagement est interdit ou restreint.
- **Zone de crue réglementée** signifie les critères approuvés applicables à un bassin donné pour définir les limites de la plaine inondable aux fins de réglementation.
- **Restreint** signifie que les nouveaux aménagements sont limités :
 - aux ouvrages d'art destinés à contrôler les crues ou l'érosion
 - aux installations qui, de leur nature même, doivent être situées près de l'eau ou traverser les cours d'eau
 - aux installations secondaires d'une utilisation des terres d'une nature passive et non structurelle et qui n'entravent pas l'écoulement des eaux dans la plaine inondable.
- **Zone de dérogation** signifie une zone de la communauté située depuis longtemps dans la plaine inondable et où le strict respect de certaines directives en vigueur dans l'ensemble de la province causerait des difficultés économiques ou sociales à cette communauté. Dans ces cas, on formule des directives spéciales qui s'appliquent exclusivement dans les limites précises de cette zone.
- **Événement découlant d'une tempête** signifie une crue importante dont les paramètres sont utilisés aux fins de réglementation. Les données relatives aux chutes de pluie qui se sont produites au cours de cette tempête peuvent être interpolées pour une autre partie du bassin et, lorsqu'on les adapte aux conditions locales, on peut établir les limites de la plaine inondable. On estime que ce concept est acceptable lorsque les données prouvent que la tempête aurait pu se produire dans d'autres bassins de la région.

En Ontario, on se base sur deux tempêtes pour établir les règlements :

- la tempête Hazel (1954); et
- la tempête de Timmins (1961).
- **Le concept des deux zones** signifie l'approche selon laquelle certaines parties de la plaine inondable dans lesquelles les crues présentent moins de dangers que dans d'autres et où l'on peut permettre l'aménagement sous certaines réserves. La zone périphérique est la partie de la plaine inondable dans laquelle on peut permettre l'aménagement, sous réserve de prendre des mesures de protection appropriées contre les inondations. Le canal de crue est la partie de la plaine inondable dans laquelle l'aménagement est interdit ou limité.
- **Bassin** signifie toute la surface drainée par une rivière ou un cours d'eau et ses affluents. (Loi sur les offices de protection de la nature, LRO 1980).

Fondement des directives

Les directives provinciales exposées dans le présent document ont été mises au point en se basant sur les principes suivants :

Objectifs

- (1) prévenir les pertes de vies humaines;
- (2) minimiser les dégâts matériels et les bouleversements sociaux; et
- (3) mener à une approche coordonnée de l'utilisation des terres et de la gestion des eaux.

Principes

- (1) on ne peut gérer la plaine inondable qu'à l'échelle du bassin en tenant compte, comme il se doit, des effets cumulatifs et des effets en amont et en aval des aménagements;
- (2) les conditions locales (caractéristiques géographiques, écologiques, économiques et sociales) varient d'un bassin à l'autre et, de ce fait, la planification et la gestion des terres inondables doit tenir compte de ces variations;
- (3) l'importance des risques (menace à la vie humaine et aux biens) peut varier d'une partie à l'autre de la plaine inondable d'un même bassin et d'un bassin à l'autre. Certaines parties peuvent être trop dangereuses pour y permettre les aménagements alors qu'on peut les autoriser sans danger dans d'autres;
- (4) on doit interdire les nouveaux aménagements susceptibles d'être endommagés par les inondations ou ceux qui provoqueraient des dégâts dus aux crues, ou les aggraveraient, aux aménagements ou aux utilisations des terres existants. Toutefois, certaines communautés sont situées depuis longtemps dans la plaine inondable et, de ce fait, on peut envisager des mesures spéciales pour assurer leur viabilité; et
- (5) la gestion de la plaine inondable et la planification de l'utilisation des terres sont des processus distincts mais connexes qui exigent la coordination d'ensemble des efforts des municipalités, des offices de protection de la nature, du ministère des Richesses naturelles et du ministère des Affaires municipales.

Directives

(1) Généralités

Les directives de la province de l'Ontario prévoient que :

- 1.1 Tous les organismes responsables de la planification¹ de l'utilisation des terres et de la gestion des ressources dans la province tiennent compte des conséquences de leurs actions qui risqueraient de compliquer la gestion des inondations ou de créer de nouvelles difficultés dans ce domaine.

¹ On entend par «conseil de planification» les conseils créés par le ministre des Affaires municipales selon les dispositions des articles (9) ou (10) de la *Loi de 1983 sur l'aménagement du territoire*.

- 1.2 Les municipalités et les conseils de planification tiennent compte des possibilités d'inondation de terrains donnés lors du processus de planification de l'aménagement du territoire dont ils sont responsables.

(2) Critères de crue réglementaire

Les directives de la province de l'Ontario prévoient que :

- 2.1 Les critères de crue réglementaire utilisés pour définir les limites de la plaine inondable aux fins de réglementation sont :
- (a) l'inondation résultant d'un des événements découlant d'une des tempêtes suivantes :
 - la tempête Hazel (1954)
 - la tempête de Timmins (1961);
 - (b) la crue séculaire; et
 - (c) une crue observée, sous réserve de l'approbation du ministre des Richesses naturelles.
- 2.2 Le niveau de la crue séculaire constitue le critère d'inondation acceptable.
- 2.3 En ce qui concerne les bassins dont les critères de crue réglementée sont supérieurs au minimum acceptable (voir figure 1), les municipalités et les conseils de planification peuvent demander au ministre des Richesses naturelles, selon des procédures établies, de modifier les critères, sous réserve des conditions suivantes qui l'emportent sur toute autre :
- (a) la modification des critères de crue réglementée existants ne sera envisagée qu'avec l'appui d'une importante majorité des municipalités ou des conseils de planification du bassin, en consultation avec l'office de protection de la nature local ou le ministère des Richesses naturelles lorsqu'il n'existe pas d'office de protection de la nature; et
 - (b) lorsque, selon l'historique des inondations, il apparaît que des critères plus élevés sont plus appropriés, on refusera de réduire les critères existants.
- 2.4 Lorsqu'une inondation dépasse les critères de crue réglementée, le ministre des Richesses naturelles peut demander la modification de ces critères pour tenir compte de l'importance de l'inondation observée.

(3) Plans Officiels

Les directives de la province de l'Ontario prévoient que :

- 3.1 Les municipalités et les conseils de planification indiquent ou décrivent les terres situées dans la plaine inondable dans leurs plans officiels et y incluent des directives régissant les nouveaux aménagements qui respectent la présente déclaration de principes.
- 3.2 Les municipalités et les conseils de planification, en consultation avec l'office de protection de la nature local ou le ministère des Richesses naturelles lors-

qu'il n'existe pas d'office de protection de la nature, incluent dans leurs plans officiels :

- (a) des directives selon lesquelles les utilisations autorisées dans la plaine inondable tiennent compte des risques d'inondation et de la susceptibilité aux inondations;
 - (b) des directives selon lesquelles aucun nouvel édifice ou structure susceptible d'être endommagé par une inondation, ou ayant des effets nuisibles sur les aménagements ou les terrains situés en amont ou en aval, ne sera autorisé;
 - (c) des directives traitant des additions ou des modifications aux structures ou aménagements existants et du remplacement des structures ou aménagements situés dans la plaine inondable; et
 - (d) des directives traitant des ouvrages publics ou privés qui, de par leur nature, doivent être situés dans la plaine inondable.
- 3.3 Les municipalités et les conseils de planification fassent ressortir, dans leur plans officiels, les contrôles de planification exigés pour appliquer les directives prévues au paragraphe 3.2.
- 3.4 Lorsqu'il n'existe pas de plan officiel, les documents de zonage affectant la région contiennent des dispositions en accord avec la présente déclaration de principes.

(4) Le concept de la zone unique

Les directives de la province de l'Ontario prévoient que, sous réserve des directives (5) et (6) :

- 4.1 La plaine inondable comportera une zone unique définie selon les critères de la crue réglementée (voir figure 2).
- 4.2 Les nouveaux aménagements seront interdits ou restreints dans la plaine inondable.
- 4.3 Lorsque l'on adopte le concept de la zone unique, les municipalités et les commissions de planification doivent inclure des directives dans leurs plans officiels expliquant le concept de la zone unique.
- 4.4 Lorsque l'on adopte le concept de la zone unique, la plaine inondable sera convenablement zonée conformément au plan officiel pour tenir compte des restrictions ou des interdictions.

(5) Le concept des deux zones

Les directives de la province de l'Ontario prévoient que :

- 5.1 Lorsque certaines parties des plaines inondables peuvent être aménagées sans inconvénients, les offices de protection de la nature de l'Ontario ou, lorsqu'il n'existe pas d'office de protection de la nature, le ministère des Richesses naturelles, en coopération avec les municipalités ou les conseils de planification du bassin, peuvent appliquer sélectivement le concept des deux zones (canal de crue—zone périphérique) (voir figure 2).

- 5.2 Les nouveaux aménagements dans le canal de crue doivent être interdits ou limités.
- 5.3 On établira les limites du canal de crue en fonction des caractéristiques locales du bassin, à savoir la profondeur et la vitesse critiques du débit, les aménagements existants et proposés, et les conséquences possibles en amont et en aval.
- 5.4 Les nouveaux aménagements qui seraient autorisés dans la zone périphérique soient protégés jusqu'au niveau de la crue réglementée.
- 5.5 Lorsqu'on se propose d'appliquer le concept des deux zones, ou lorsque ce concept est une solution possible, les municipalités et les conseils de planification incluent dans leurs plans officiels des directives qui définissent les intentions de ce concept et le potentiel d'aménagement de la zone périphérique par rapport à celles du canal de crue.
- 5.6 Lorsqu'on applique le concept des deux zones, le canal de crue sera zoné selon les désignations du plan officiel, et les risques présentés par les inondations ainsi que les protections nécessaires seront exposés dans le document de zonage.
- 5.7 Lorsqu'on applique le concept des deux zones, le canal de crue sera zoné de façon à tenir compte des restrictions ou des interdictions d'utilisation appropriées.

(6) Concept des zones de dérogation

Les directives de la province de l'Ontario prévoient que :

- 6.1 Lorsque la stricte application des directives 3 et (ou) 4 n'est pas possible, on envisagera d'appliquer le concept des zones de dérogation pour certaines municipalités, ou parties de municipalités, sujettes aux inondations. Les municipalités peuvent demander à appliquer ce concept selon des procédures établies et peuvent autoriser des aménagements contrôlés une fois leur demande acceptée.
- 6.2 Les municipalités définissent les zones de dérogation dans leurs plans officiels et y incluent des directives faisant ressortir les conditions selon lesquelles les nouveaux aménagements peuvent être autorisés ainsi que les mesures de protection minimale acceptables pour ces aménagements.

(7) Protection contre les inondations

Les directives de la province de l'Ontario prévoient que :

- 7.1 Tout nouvel aménagement autorisé dans la plaine inondable, selon les principes exposés ici, soit protégé contre les inondations par des mesures acceptables.
- 7.2 Que les entrées et les sorties des nouveaux édifices soient conçues de façon à ce que le mouvement des véhicules et des personnes ne soit pas gêné lors des inondations.

(8) Sécurité publique

Les directives de la province de l'Ontario prévoient que, nonobstant les directives (3) à (7) incluses :

CONCEPT DE LA ZONE UNIQUE

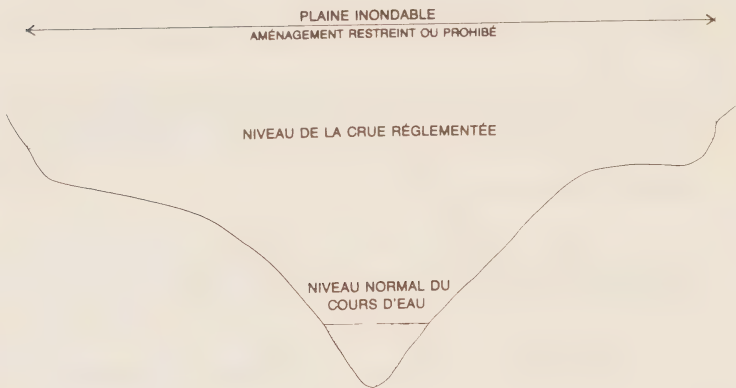

Figure 2

LE CONCEPT DES DEUX ZONES : CANAL DE CRUE - ZONE PÉRIPHÉRIQUE

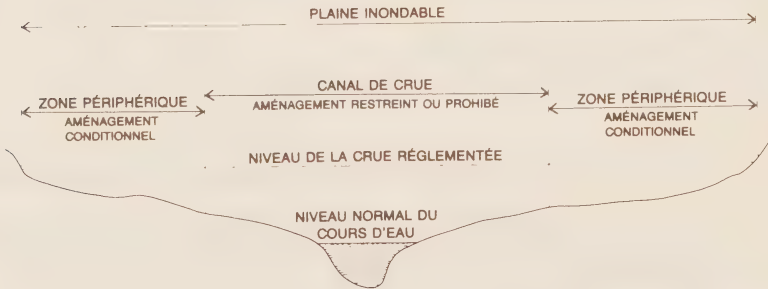

Figure 3

8.1 Les nouveaux aménagements ne soient pas autorisés dans la plaine inondable s'ils sont :

- (a) associés à la fabrication, le stockage et (ou) la consommation de substances dangereuses, ou le traitement, le recueil et l'évacuation des eaux d'égout, qui créeraient des dangers à la sécurité publique au cas où elles s'échapperaient de leur conteneurs/emplois normaux en raison d'une inondation ou de la défaillance des mesures protectrices;
- (b) associés à des services institutionnels tels qu'hôpitaux, maisons de soins ou écoles, dont l'évacuation d'urgence ne pourrait se faire sans mettre en danger les personnes concernées (malades, personnes âgées, enfants) en cas d'inondation ou de défaillance des mesures protectrices;
- (c) associés à des services tels que pompiers, police, postes d'ambulance ou transformateurs électriques dont le fonctionnement serait compromis en cas d'inondation ou de défaillance des mesures protectrices.

8.2 Lorsqu'on estime que de nouveaux aménagements objets de 8.1 ne présentent pas de dangers inacceptables à la sécurité publique, une protection plus efficace contre les inondations ou des mesures protectrices additionnelles des installations situées sur des terrains plus élevés que le niveau de la crue réglementée particulier des aménagements.

Mise en oeuvre

- Lorsqu'ils exercent des compétences touchant à la planification, les conseils de planification des municipalités, les conseils locaux, les ministres de la Couronne et les ministères, conseils, commissions et organismes du gouvernement, y compris la Commission des affaires municipales de l'Ontario et Ontario Hydro, doivent adhérer à la présente déclaration de principes, comme le prévoit l'article 3 de la Loi de 1983 sur l'aménagement du territoire.
- Le ministère des Richesses naturelles et celui des Affaires municipales énonceront des directives pour l'application de la présente déclaration de principes, y compris l'application de la Loi de 1983 sur l'aménagement du territoire telle qu'elle se rapporte aux terres inondables.
- Le ministère des Richesses naturelles élaborera des directives techniques pour le calcul des limites de crue et la cartographie des plaines inondables.
- Le ministère des Richesses naturelles, en collaboration avec le ministère des Affaires municipales, élaborera les procédures à suivre pour demander la modification des critères de crue réglementée applicables à un bassin donné.
- Le ministère des Richesses naturelles et celui des Affaires municipales élaboreront les procédures à suivre pour demander des zones de dérogation.
- Le ministère des Richesses naturelles, en collaboration avec le ministère des Affaires municipales et le ministère du Logement, ainsi que les organismes appropriés, décidera des mesures de protection contre les inondations acceptables et de leur application à divers types d'utilisation des terres.

- Les offices de protection de la nature, là où ils existent, seront chargés de fournir des données et d'effectuer des études de planification en ce qui concerne les questions relatives à la plaine inondable et, à cet égard, ils devront :
 - mettre à la disposition des organismes gouvernementaux et des organismes de planification, et tout spécialement des municipalités et des conseils de planification, les cartes, données et études existantes, fournir une aide technique et, aider les municipalités et les conseils de planification à tenir compte de la déclaration de principes de la province relative à la gestion de la plaine inondable lors du processus de planification des utilisateurs des terres et de la rédaction des documents de planification connexes;
 - fournir aux organismes chargés des révisions et des approbations des commentaires sur les mesures de planification proposées qui pourraient avoir des conséquences sur la gestion de la plaine inondable;
 - offrir des conseils et une expertise technique à la Commission des affaires municipales de l'Ontario, ou autre organisme d'appels, lorsqu'une question objet de la présente déclaration de principes est en cause;
 - consulter les ministères, organismes publics, conseils, commissions, offices et municipalités sur les questions relatives à la gestion de la plaine inondable, selon les besoins; et
 - informer et éduquer le public sur les principes et pratiques de la gestion de la plaine inondable et donner des renseignements sur les caractéristiques et les conséquences d'une crue.

Lorsqu'il n'existe pas d'office de protection de la nature, le ministère des Richesses naturelles est chargé de fournir des données et d'effectuer la revue des questions relatives à la plaine inondable.

- Les offices de protection de la nature seront chargés d'appliquer la **Loi sur les offices de protection de la nature, L.R.O. 1980**, et les règlements sur les remblais, constructions² et modifications aux cours d'eau pris en application de l'article 28 de la loi, ou dispositions postérieures, pour favoriser l'application de la présente déclaration de principes.
- Le ministère des Richesses naturelles, conjointement avec le gouvernement fédéral, continuera à être chargé d'appliquer l'Accord Canada-Ontario sur la réduction des dommages causés par les inondations, par le biais des offices de protection de la nature et des municipalités. Ceci couvre les études sur les inondations et la cartographie de la plaine inondable, ainsi que l'établissement de cartes destinées au grand public et indiquant les régions susceptibles d'être inondées.
- Le ministère des Affaires municipales et les municipalités auxquelles le ministre délègue son autorité veilleront à ce que tous les documents municipaux de planification soumis au processus de révision ou d'approbation respectent les principes exposés par le présent document.

² L'élément «construction» de règlements des offices de protection de la nature s'applique aux régions drainant 125 hectares ou plus. Les surfaces inférieures à 125 hectares sont considérées comme des «drainages locaux» et relèvent des municipalités où elles sont situées.

- Lorsqu'un plan officiel ou une ordonnance de zonage doit être révisé, on tiendra compte des principes exposés par le présent document.
- Les municipalités, avec les données qui leur seront fournies par les offices de protection de la nature, ou le ministère des Richesses naturelles lorsqu'il n'existe pas d'office de protection de la nature, mettront en place les contrôles de planification nécessaires pour mettre en application les dispositions relatives à la plaine inondable que contiennent les plans officiels (telles que le zonage, le contrôle des plans de sites).
- Le ministère des Richesses naturelles et le ministère des Affaires municipales entreprendront des programmes périodiques de recherche sur les techniques de gestion de la plaine inondable et sur la mise à jour de l'application de la planification.
- Le ministère des Richesses naturelles et le ministère des Affaires municipales, en coopération avec les offices de protection de la nature, seront chargés d'administrer la présente déclaration de principes, ainsi que de conseiller les municipalités, les conseils de planification et autres organismes à son sujet, et de leur expliquer son contenu et son application.

**ORDER MADE UNDER THE
ENVIRONMENTAL ASSESSMENT ACT**

**EXEMPTION—MINISTRY OF GOVERNMENT
SERVICES—MGS-81**

Having received a request from the Ministry of Government Services that an undertaking, namely:

The activities involved in the implementation of an Office Complex at a site which is legally referred to as lots 12, 13, 14, 15 and 16 and part of Lot 11 South of Bay Street in the original Townplot and part of units 1 and 3 and all of Unit 2, Plan D-39 and part of Water Lots in front of lots 12 to 16 South of Bay Street in the City of Sault Ste. Marie, District of Algoma.

be exempt from the application of the Act pursuant to section 29; and

Having been advised by the Ministry of Government Services that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The Crown will be interfered with and damaged by the undue delay and expense required to prepare an environmental assessment for an activity for which significant adverse environmental impacts are not anticipated.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. The proposed undertaking will have no significant adverse effects on the environment that cannot be eliminated through the proposed mitigation measures.
- B. The Ministry of the Environment is satisfied with the procedures incorporated in the undertaking with respect to the preparation and utilization of a site which is at present contaminated.

This exemption is subject to the following terms and conditions:

1. Where any activity which otherwise would be exempt under this order is being carried out as or is part of an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this order.
2. Where any activity which is the subject of this order is being carried out as or is part of another undertaking which is the subject of

an exemption order under the Act, the activity exempt under this order shall be carried out in accordance with any terms or conditions in the other exemption order as well as the conditions in this order.

3. Soil samples must be taken at a minimum of ten stations spread out across the project site. The surface soil/fill from these sites should be sampled from at least one 5 cm increment depth within a 30 cm depth. At each of the ten stations, a composite sample should be collected from approximately a 2-3 metre radius, consisting of a minimum of ten cores from the depth being sampled. Samples should be analyzed for parameters contained in the MOE draft Clean-Up Guidelines for Soils and other such parameters as may be appropriate to the site.
4. Further, soil from several proposed planting areas and publicly accessible landscape areas, including the outdoor play area for the Child Care Centre, must be analyzed prior to the placement of the 10 cm of topsoil cover to ensure compliance with the Clean-Up Guidelines. Soil from lawn areas and shrub beds should be sampled at 0-5 cm and 10-15 cm depths. At sites where deep rooted trees are to be established, soils should additionally be collected between 30 cm and 2 metres depth.
5. Where contaminants identified from the above sampling processes exceed the criteria contained in the draft Clean-Up Guidelines or other such criteria that may be applied to this site, a remedial work plan must be developed in consultation with the MOE Regional Office and submitted to the MOE Regional Director, for approval and subsequent implementation by the proponent.
6. Those overburden and excavated materials that do not exceed the criteria contained in Condition 5 will be retained on site and utilized to develop landscaping features such as berms. If any excavated material is considered for transfer offsite, it will be subject to the requirements of Regulation 309 and will be disposed of in an approved landfill site.
7. Construction activity at the site will be undertaken in a fashion so as to cause minimal disruption to the surrounding community. The use of muffled equipment, dust settling procedures, appropriate hours of work and the maintenance of a neat and tidy construction site by the contractor shall ensure minimal disruption in the affected area.
8. This order shall expire if construction activities have not commenced by December 31, 1990. O. Reg. 711/88.

Rapport du vérificateur

Loi sur les élections municipales
(Article 131(2))

Nom du candidat et de son
directeur des finances, le cas échéant

Nous avons vérifié les états de l'actif et du passif et des recettes et des dépenses de _____, candidat, pour la période de campagne électorale arrêtée le 31 mars 19____ et relative aux élections municipales tenues le _____ novembre 19 ____ . Notre vérification a été effectuée conformément aux normes de vérification généralement reconnues et a comporté, par conséquent, les sondages et autres procédés que nous avons jugés nécessaires dans les circonstances, sous réserve des précisions présentées dans le paragraphe suivant.

En raison de la nature des opérations menées durant une campagne électorale, les méthodes de vérification ne peuvent vraiment établir si les livres comptables comprennent bien tous les dons de biens et de services et toutes les entrées et sorties de fonds survenus durant la période de campagne électorale. Notre vérification de ces opérations s'est donc limitée à assurer que les états financiers sont conformes aux sommes inscrites dans les livres comptables du candidat, conformément aux méthodes comptables établies par la Loi sur les élections municipales. Nous n'avons pu établir s'il était nécessaire de redresser les entrées et les sorties de fonds.

À notre avis, sous réserve de l'effet des redressements susmentionnés, le cas échéant, que nous aurions trouvé nécessaire d'apporter si nous avions pu nous assurer de l'exhaustivité des livres, telle que nous la définissons au paragraphe précédent, ces états présentent fidèlement l'information contenue dans les livres comptables sur lesquels ils se fondent, conformément à l'application des méthodes comptables prévues dans la Loi sur les élections municipales.

- E. Local residents are anxious that the work should be carried out as quickly as possible.

MOTOR VEHICLE TRANSPORT ACT, 1987

M.V.T.A. 1987, PART 11, TRUCK APPLICATIONS

The following applicants have made applications for extra-provincial operating licences.

Recently, the Divisional Court of Ontario determined that the Ontario Highway Transport Board is the provincial transport board under the Act, and therefore for greater certainty, notice of these applications are re-published herein with reference only to the applicant's name, file number and date of earlier publication.

Any interested person may file an objection within 15 days and written evidence within 25 days of the date of this publication that satisfies the Board that, in the absence of evidence to the contrary, the operation of the undertaking in respect of which the licence is sought would likely be detrimental to the public interest. Persons who have already filed either a notice of objection or written evidence on any particular application noted below need not re-submit this material, and will be considered parties to the proceeding.

For further information with respect to these applications, members of the public are advised to contact the Secretary of the Board.

THE ONTARIO HIGHWAY TRANSPORT BOARD

NOTICE

Re: Applications for Limousine Permits at Lester
B. Pearson International Airport

The Board has concluded eight days of hearings during which general policy submissions were received from all interested parties. The Board will now schedule hearings to consider the merits and qualifications of each applicant.

Transport Canada has clarified the criteria to be used following the Board's recommendations as to qualified applicants. Legal entities such as companies, co-operatives and associations will be invited to submit tenders on the basis of a minimum of ten limousine permits valid for ten years.

Should individual applicants wish their application to be heard as part of a group, and qualify as a legal entity, written notice must be filed with the Board listing all applicants in the group.

Notice of hearing dates for each application will be published in the Ontario Gazette and will be mailed to each applicant. Such Notices will also be posted at the Board's office and at the office of the Manager of Ground Transportation at Lester B. Pearson International Airport.

Felix D'Mello
Secretary of the Board

NOTE: Objections to these applications must be served on the applicant and filed with the provincial transport board within twenty-nine days of this publication. Any interested person who serves and files an objection must also provide the provincial transport board with written evidence, within thirty-nine days of this publication, that satisfies the board that, in the absence of

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 722/88.

Exemption—Ministry of the

Environment—MOE-37.

Made—November 10th, 1988.

Approved—November 10th, 1988.

Filed—December 5th, 1988.

ORDER MADE UNDER THE
ENVIRONMENTAL ASSESSMENT ACTEXEMPTION—MINISTRY OF THE
ENVIRONMENT—MOE-37

Having received a request from the Regional Director, Northwestern Region, Ministry of the Environment that an undertaking, namely:

The clean-up of pooled creosote from the Thunder Bay Harbour floor adjacent to Northern Wood Preservers

be exempted from the application of the Act pursuant to section 29; and

Having been advised by the Regional Director, Northwestern Region, that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the property indicated will occur:

- A. Because of the demonstrated mobility and toxicity of the pools of creosote at this location additional areas and water and the organisms therein will be adversely affected by the creosote if it is not removed.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking

ing is exempt from the application of the Act for the following reason:

- A. The pools of creosote represent a serious environmental problem which warrants immediate action while steps are being taken to compel the persons responsible therefore to clean up the balance of the creosote contamination in the vicinity. Delays which would be engendered by the application of the Act will allow the source of this contamination to become more widespread and more costly and difficult to remediate. It is, therefore, in the public interest to conduct this initial clean-up as expeditiously as possible.

This exemption order is subject to the following terms and conditions:

1. Upon completion of the work, a written report will be submitted to the Director of the Environmental Assessment Branch describing the activities involved in this undertaking. This report will be made available for inspection by the public.
2. The Ministry will inform the Canadian Coast Guard, Thunder Bay Harbour Commission and other appropriate agencies which have concerns with respect to the undertaking before the commencement of the undertaking.
3. An environmental monitoring and inspection program will be conducted during the undertaking to assess ambient water quality conditions.
4. This Order does not apply with respect to creosote NOT removed before December 31, 1990. O. Reg. 722/88.

MOTOR VEHICLE TRANSPORT ACT, 1987

MOTOR VEHICLE TRANSPORT ACT, 1987, PART 11, TRUCK APPLICATIONS

The following applicants have made applications for extra-provincial operating licences.

Recently, the Divisional Court of Ontario determined that the Ontario Highway Transport Board is the provincial transport board under the Act, and therefore for greater certainty, notice of these applications are re-published herein with reference only to the applicant's name, file number and date of earlier publication.

Any interested person may file an objection within 15 days and written evidence within 25 days of the date of this publication that satisfies the Board that, in the absence of evidence to the contrary, the operation of the undertaking in respect of which the licence is sought would likely be detrimental to the public interest. Persons who have already filed either a notice of objection or written evidence on any particular application noted below need not re-submit this material, and will be considered parties to the proceeding.

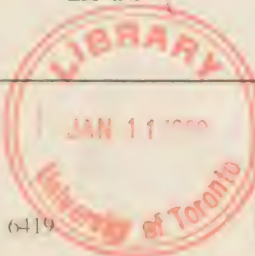

For further information with respect to these applications, members of the public are advised to contact the Secretary of the Board.

Calculations Under Clause 39a (1) (b) of the Act.

Made—December 15th, 1988.

Filed—December 16th, 1988.

REGULATION MADE UNDER THE
INSURANCE ACTCALCULATIONS UNDER CLAUSE 39a (1) (b) OF
THE ACT

INTERPRETATION

1.—(1) In this Regulation,

"calculation date" means the date as of which calculations are made for the purposes of this Regulation;

"foreign branch insurer" means an insurer registered under the *Foreign Insurance Companies Act* (Canada);

"investment valuation reserve" means the investment valuation reserve calculated in accordance with Schedule 1;

"market value", in relation to an asset, means the amount determined under section 7.

(2) In this Regulation, a company is considered to be a subsidiary of an insurer if the insurer owns directly or indirectly a majority of the shares carrying the right to elect a majority of the members of the board of directors of the company. O. Reg. 740/88, s. 1.

2.—(1) Financial information used in calculations under this Regulation shall be determined in accordance with generally accepted accounting principles used in Canada except when otherwise required under this Regulation.

(2) In this Regulation,

(a) the amount of a claim or a reserve for a claim includes all costs incurred or likely to be incurred by the insurer in adjusting and settling the claim; and

(b) when an insurer has issued contracts on a premium note system, unpaid assessments levied in respect of all outstanding premium notes held by the insurer shall be deemed to be a reserve for unearned premiums.

(3) For the purposes of subsection (2), the amount of a reserve and the amount of the liabilities of an insurer are net of adjustments for reinsurance, if any, made in accordance with section 11. O. Reg. 740/88, s. 2.

APPLICATION

3. This Regulation does not apply to an insurer that comes within a class set out in paragraph 4, 5, 7, 8 or 9 of subsection 23 (1) of the Act. O. Reg. 740/88, s. 3.

DETERMINATION OF REASONABLE RELATIONSHIP

4. For the purposes of clause 39a (1) (b) of the Act, the amount of the assets of an insurer bears a reasonable relationship to the outstanding liabilities, premiums and loss experience of the insurer if the value of the assets, as determined under section 5 or 6, is greater than or equal to the aggregate amount, as determined under section 8. O. Reg. 740/88, s. 4.

ASSET VALUE

5.—(1) The value of the assets of an insurer, other than a foreign branch insurer, is the amount determined by the formula,

$$A - (B + C + D + E + F)$$

in which,

"A" is the sum of,

- (a) the value of the assets determined in accordance with this Regulation, and
- (b) the amount the insurer sets out in Column 4 of item 8 in Table 1 to Schedule 1,

"B" is an amount equal to the sum of,

- (a) any amounts owing on the calculation date to the insurer by agents or brokers that the insurer invoiced to the agents or brokers at least sixty-five days before the calculation date,
- (b) any unpaid capital or unpaid premium in respect of subscribed shares of capital stock of the insurer,
- (c) the book value of automobiles and of office furnishings and equipment other than computer hardware,
- (d) the book value of any investments that are not authorized by a special or general act to which the insurer is subject,
- (e) any amount recorded by the insurer as a deferred income tax debit or a prepaid expense, and
- (f) any amount recorded by the insurer as goodwill, a capitalized leasehold expense or a capitalized development cost,

"C" is the amount of the investment valuation reserve,

"D" is the deferred policy acquisition expense,

"E" is the amount, if any, determined under subsection (3), and

"F" is the amount, if any, greater than zero that is determined under subsection (6).

(2) The value of an insurer's investment in a subsidiary shall be determined using the equity method and not using the consolidated method.

(3) If an insurer has assets receivable or liabilities payable in a currency other than Canadian dollars, the amount for "E" in subsection (1) is determined by the formula,

$$(A - B) - (C - D)$$

in which,

"A" is the book value in Canadian dollars of all such assets, excluding those assets included in the calculation of "B" under subsection (1),

"B" is the book value in Canadian dollars of all such liabilities,

"C" is the Canadian dollar equivalent calculated in accordance with subsection (4) of all such assets, excluding those assets included in the calculation of "B" under subsection (1), and

"D" is the Canadian dollar equivalent calculated in accordance with subsection (5) of all such liabilities.

(4) The Canadian dollar equivalent of the assets referred to in the description of "C" in subsection (3) is determined for each asset by multiplying the value of the asset expressed in the foreign currency by the rate of exchange in effect on the calculation date.

(5) The Canadian dollar equivalent of the liabilities referred to in the description of "D" in subsection (3) is determined for each liability by multiplying the value of the liability expressed in the foreign currency by the rate of exchange in effect on the calculation date.

(6) Subject to subsection (7), if the assets of the insurer include an investment in common shares of another corporation that transacts the business of insurance, other than the business of life insurance, the amount for "F" in subsection (1) is determined by the formula,

$$A - (B/C \times (D - E))$$

in which,

"A" is the book value of the insurer's investment in the common shares of the investee corporation,

"B" is the number of paid-up common shares of the investee corporation owned by the insurer,

"C" is the number of paid-up common shares of the investee corporation,

"D" is the value of the assets of the investee corporation calculated in accordance with this section, and

"E" is the aggregate amount for the investee corporation, calculated in accordance with section 8.

(7) If the insurer has insufficient information to calculate either "D" or "E" in subsection (6), the value for "D" and "E" is zero. O. Reg. 740/88, s. 5.

6. The value of the assets of a foreign branch insurer is the amount determined by the formula,

$$A - B$$

in which,

"A" is the sum of,

- (a) the book value of all deposits under the *Foreign Insurance Companies Act* (Canada) by the insurer with the federal Minister responsible under that Act,
- (b) the book value of all assets vested in trust for the insurer under the *Foreign Insurance Companies Act* (Canada),
- (c) the amount the insurer sets out in Column 4 of item 8 in Table 1 to Schedule 1, and
- (d) any amounts owing on the calculation date to the insurer by agents or brokers that the insurer invoiced to the agents or brokers less than sixty-five days before the calculation date, and

"B" is the insurer's investment valuation reserve in respect of the assets included in calculating "A". O. Reg. 740/88, s. 6.

BOOK VALUE AND MARKET VALUE

7.—(1) The market value of an asset is the most probable price that a buyer would pay to a seller, both acting prudently, knowledgeably and willingly, in an arm's length transaction in an open market under conditions requisite to a fair sale.

(2) If the interest payable to an insurer in respect of an asset that is a debt security is more than six months in arrears, the book value of the asset shall be deemed to be its market value. O. Reg. 740/88, s. 7.

AGGREGATE AMOUNT

8.—(1) In this section, "alternate margin factor", in relation to a class of insurance, means the alternate margin factor determined under section 10.

(2) The aggregate amount for an insurer is the sum of,

- (a) the amount of the reserve in respect of non-cancellable accident and sickness contracts;
- (b) the amount of the reserve for claims in respect of accident and sickness contracts that are payable in installments;

(c) the total amount of the insurer's liabilities, as determined under section 9, less the amount of any liabilities that are included in clauses (a) and (b);

(d) the amount of the reserve for claims in respect of accident and sickness contracts other than contracts that are described in clause (a) or (b), multiplied by 0.15;

(e) the amount of the reserve for unearned premiums in respect of accident and sickness contracts, other than non-cancellable contracts, multiplied by 0.15 or by the alternate margin factor, if any; and

(f) an amount in respect of contracts, other than accident and sickness contracts, that is the greatest of;

(i) the sum of,

(A) the amount of the reserve for unearned premiums in respect of the contracts, multiplied by 0.15 or by the alternate margin factor, if any, and

(B) the amount of the reserve for claims in respect of the contracts multiplied by 0.15,

(ii) the sum of,

(A) the amount of the gross premiums written by the insurer in respect of the contracts written in the twelve months preceding the calculation date, multiplied by 0.15, and

(B) the lesser of,

1. \$500,000, and

2. the amount of the gross premiums written as described in sub-subclause (A), multiplied by 0.05, and

(iii) the amount that is 0.22 times,

(A) for an insurer that has been in business for thirty-six months or longer, the average annual amount of claims incurred by the insurer during the thirty-six months preceding the calculation date in respect of the contracts, or

(B) for an insurer to whom sub-subclause (A) does not apply, the product that is obtained by

multiplying the average monthly amount of claims incurred by the insurer during the period that the insurer has been in business by twelve in respect of the contracts,

plus the lesser of,

(C) \$500,000, and

(D) the amount calculated under sub-subclause (A) or (B), as the case may be, multiplied by 0.07. O. Reg. 740/88, s. 8.

VALUE OF LIABILITIES

9.—(1) The value of the liabilities of an insurer is the sum of,

(a) the value of the liabilities determined in accordance with this Regulation;

(b) the lesser of,

(i) 50 per cent of the accumulated profit realized from the insurer's hail insurance business, during the time the insurer has transacted the business of hail insurance, or

(ii) 50 per cent of the insurer's net premiums written for hail insurance written during the twelve months preceding the date that is one year before the calculation date;

(c) the absolute value of the reserve in respect of non-cancellable accident and sickness contracts, where the amount of the reserve is less than zero; and

(d) the amount, if any, that is determined under subsection (2).

(2) If an insurer has reinsured any risk under contracts of insurance written by it with a reinsurer that is not licensed under the Act, the *Canadian and British Insurance Companies Act* (Canada) or the *Foreign Insurance Companies Act* (Canada), the amount used in the calculation under subsection (1) is the sum of the amounts that are greater than zero, calculated separately for each such reinsurer, using the formula,

$$(A + B + C + D + E) - (F + G)$$

in which,

"A" is the total of the insurer's reserves for unearned premiums in respect of the risks reinsured with the reinsurer, other than non-cancellable accident and sickness risk,

"B" is the total of the insurer's liabilities in respect of

the risks reinsured with the reinsurer under non-cancellable accident and sickness contracts,

"C" is the insurer's additional policy reserves in respect of the risks reinsured with the reinsurer, which equals the sum of,

(a) 0.105 times the reinsurer's original premium for every surety contract,

(b) 0.3 times the reinsurer's original premium for every fidelity contract, and

(c) the reinsurer's reinsurance premium less the reinsurer's commission for every current nuclear contract,

"D" is the amount of the reserve for claims that the insurer is entitled to recover, but has not recovered, from the reinsurer,

"E" is the amount payable to the insurer by the reinsurer,

"F" is the amount payable to the reinsurer by the insurer, and

"G" is, subject to subsection (3), the value of all security including cash given to the insurer by the reinsurer.

(3) For the purpose of calculating "G" in subsection (2), if a reinsurer has given one or more letters of credit to an insurer as security for contracts insuring risks in Canada, the amount by which the total value of the letters of credit exceeds 0.15 times the sum of "A" and "D" as calculated under that subsection shall not be included as part of the value of all security. O. Reg. 740/88, s. 9.

ALTERNATE MARGIN FACTOR

10.—(1) In this section,

"claims ratio", in relation to contracts issued by an insurer in a class of insurance, means the ratio of the claims incurred under the contracts during a given period to the premiums earned under the contracts during that period;

"expected claims ratio" means a claims ratio that the insurer reasonably expects for the period of the unexpired terms of the contracts to which it applies.

(2) If an insurer's expected claims ratio for a class of insurance is less than 0.95, the insurer may select a claims ratio for the class that is greater than or equal to the greater of,

(a) the expected claims ratio; and

(b) the actual claims ratio for the twelve months immediately preceding the calculation date.

(3) The alternate margin factor for a class of insurance is calculated by adding 0.20 to the claims ratio selected by the insurer under subsection (2), and subtracting 1.00 from the total.

(4) For the purposes of clause 8 (2) (e) and subclause 8 (2) (f) (i) (A), if the applicable alternate margin factor is less than zero, it shall be deemed to be zero. O. Reg. 740/88, s. 10.

REINSURANCE

11.—(1) In this section, “reinsurer”, in relation to an insurer, means a second insurer that insures all or part of the liabilities of the insurer under contracts issued by the insurer for risks insured in Canada.

(2) In this section, an insurer’s reinsurance ratio is described by the fraction,

reinsured claims

total claims

in which,

“reinsured claims” means the total amount of claims, excluding claims under accident and sickness contracts, that were incurred during the twelve months preceding the calculation date and that the insurer has recovered or is entitled to recover from reinsurers;

“total claims” means the total amount of claims, excluding claims under accident and sickness contracts, incurred by the insurer during the same period.

(3) For the purpose of calculating the aggregate amount under section 8, if an insurer has reinsured any risk under contracts of insurance issued by it,

(a) subject to subsection (4), the amounts determined under clauses 8 (2) (a) to (e) and subclause 8 (2) (f) (i) may be reduced by the amount attributable to the risk transferred to reinsurers in each instance; and

(b) the amounts determined under subclauses 8 (2) (f) (ii) and (iii) may be reduced,

(i) for an insurer whose licence under the Act restricts it to undertaking reinsurance, by an amount that does not exceed the amount determined under the subclause multiplied by the reinsurance ratio, and

(ii) if subclause (i) does not apply, by an amount that does not exceed the amount determined under the subclause multiplied by the lesser of 0.5 or the reinsurance ratio.

(4) For the purposes of clause (3) (a), the amount attributable to the risk transferred by the insurer to

reinsurers that are not licensed under the Act, the *Canadian and British Insurance Companies Act* (Canada) or the *Foreign Insurance Companies Act* (Canada) shall be deemed to be the amount of the security respecting the transferred risk, if any, that has been given to the insurer by the reinsurers and is kept in Canada. O. Reg. 740/88, s. 11.

TRANSITIONAL

12. Subsection 9 (3) does not apply with respect to a letter of credit that is given as security for a contract entered into before the 1st day of January, 1989. O. Reg. 740/88, s. 12.

13. This Regulation comes into force on the 1st day of January, 1989.

“mortgage loans” include hypothecs, charges and agreements of sale;

“real estate” includes leaseholds;

“short term”, in relation to a debt security, means maturing within five years from the calculation date.

2.—(1) For the purposes of calculating an insurer’s investment valuation reserve, an insurer must complete Tables 1 and 2 to this Schedule.

(2) An insurer’s investment valuation reserve is the amount set out as item 11 in Column 2 of Table 2 to this Schedule.

3.—(1) The amount to be entered for an item in Column 4 of Table 1 to this Schedule is calculated by subtracting the book value set out in Column 2 from the market value set out in Column 3, and,

(a) if that number is positive, entering it in Column 4; or

(b) if that number is not positive, entering zero in Column 4.

(2) The amount to be entered for an item in Column 5 of Table 1 to this Schedule is calculated by subtracting the market value in Column 3 from the book value in Column 2, and,
